OUR PRODUCTS

01. TriNevaShield Primer (Epoxy)

A low VOC, high-build epoxy mastic coating designed for steel surfaces with minimal surface prep. Offers superior durability and corrosion resistance, ideal for offshore, marine, and maintenance applications.

02. TriNevaShield Intermediate (Epoxy)

A high-solid, polyamide-cured epoxy coating for structural steel, offering excellent moisture and abrasion resistance. Ideal for coastal, industrial, and marine environments where high film thickness and durability are essential.

03. TriNevaShield Antifouling Topcoat

A high-strength, long-life vinyl antifouling paint offering durable resistance to marine fouling. Suitable for application over epoxy or tar-based coatings, it withstands prolonged atmospheric exposure.

04. TriNevaShield Marine Finish

A high-performance, two-component epoxy enamel offering a glossy, chemical-resistant finish for metal and masonry. Ideal for industrial and marine use, it provides tough, moisture-resistant protection with excellent durability.

05. TriNevaShield Acrylic PU Finish

A high-gloss, two-pack acrylic polyurethane topcoat with excellent weathering, color retention, and chemical resistance. Ideal for use in medium corrosive environments due to its durability and toughness.
